# Data Engineer P1

**Primary Location: Gurugram, India**

About the Role:

We are seeking a skilled and motivated **Snowflake/SQL Developer** to join our data engineering team. The ideal candidate will have hands-on experience in designing, developing, and optimizing data pipelines and solutions using Snowflake. You will work closely with cross-functional teams to support data-driven decision-making and ensure the scalability and performance of our data infrastructure.

Our tools include Snowflake, SQL, Tableau, Power BI

**Key Responsibilities:**

- Design and develop scalable data pipelines and ETL processes using Snowflake.
- Implement data models, data marts, and data warehouses to support business intelligence and analytics.
- Optimize Snowflake performance through clustering, partitioning, and query tuning.
- Collaborate with data analysts, business stakeholders, and other developers to understand data requirements.
- Ensure data quality, integrity, and security across all Snowflake environments.
- Automate data workflows and integrate Snowflake with other tools (e.g., dbt, Airflow, Azure/AWS/GCP).
- Monitor and troubleshoot data pipeline issues and provide timely resolutions.

**Requirements:**

- BTech/MTech in Computer Science/Electrical engineering or equivalent experience, with a strong software development background.
- 0–2 years of experience working with Snowflake in a professional setting.
- Strong SQL skills and experience with data modeling concepts.
- Experience with ETL tools and frameworks (e.g., Informatica, Talend, dbt, Apache Airflow).
- Familiarity with cloud platforms (AWS, Azure, or GCP) and their data services.
- Understanding of data warehousing principles and best practices.
- Experience with version control systems (e.g., Git) and CI/CD pipelines.
- Excellent problem-solving and communication skills.

**Preferred Qualifications:**

- Snowflake certification(s) is a plus.
- Experience with Python or other scripting languages.
- Knowledge of BI tools like Tableau or Power BI.
- Exposure to Agile methodologies and DevOps practices.
- Supply Chain/ Procurement functional Knowledge is a Plus.

**Working Conditions**
• Hybrid Work Mode
